

9. Outer Mirror

A: REPLACEMENT

- 1) Face the mirror upward.
- 2) Use a flat tip screwdriver to remove clip (A).
- 3) Lift the lower mirror up to remove hooks (B).

- 4) Disconnect the mirror heater connector from the end of mirror. (Model with mirror heater)

- 5) Catch the hooks (A) and install clips (B).

CAUTION:

- When removing the mirror, be careful not to damage the back side of mirror with a flat tip screwdriver.
- When installing the mirror, insert the hook and clip securely.
